* Subject to compatible terminal and subscription ** The "estimated maximum speed" is the maximum speed that users can expect to achieve at different locations in the coverage area under realistic conditions. This maximum value results from measurements on the whole national territory and might vary depending on the selected compatible tariff plan, the device performance and your location during the use of the service. 5G being under deployment, the speed estimation is based on limited data.

*** The "optimal maximum speed" is the maximum speed that can be reached under optimal conditions and might vary depending on the selected compatible tariff plan, the device performance and your location during the use of the service.

If despite a normal use, the service quality of the Internet service presents a continuous or recurrent discrepancy in comparison with the estimated maximum speed, the consumer can lodge a complaint with the Customer service.
